

Quelle: Schwipps „Lilienthal und die Amerikaner“

Note of O. Chanute

Valuable lessons. Lilienthal

1. Safety comes from small surfaces instead of large, while learning, as wind gusts destroy balance.
2. Not safe to experiment in wind more than 22 miles per hour, till skill is acquired.
3. Must be able to abandon apparatus instantly when it takes a sheer.
4. Upright position is best, as most natural for man.
5. There is no mystery ab[ou]t flight.
